- XII(karnataka State Board) | Diamond College — *94.2%| 2023*
- X(CBSE) | Basaveshwar Public School — 79.2% | 2021

ACADEMIC PROJECTS

- **My PortFolio Website**
  This is my personal portfolio built to showcase my work, skills, and background in a clean and modern way. It's fully responsive and easy to navigate, giving visitors a quick overview of who I am and the projects I've worked on.

- **Secure File Transfer System**
  A hackathon project that enables secure and efficient file sharing between users through a backend-powered system. It features a responsive UI and seamless file transfer experience.

- **Code-Editor-Electron App**
  This is a desktop code editor I built using Electron.js. It supports opening, editing, and saving files, includes syntax highlighting, and even has an integrated terminal. The goal was to create a simple, lightweight editor that makes coding easier and smoother.

- **Chatbot-AI**
  This is an AI-powered chatbot built using modern Web Development tools. It can understand user queries and respond in a conversational way, making interactions smooth and intuitive. The project focuses on creating a simple, responsive, and engaging chat interface.

POSITION OF RESPONSIBILITY

- **Weather Forecast Web App**
  Integrated a third-party weather API into a React application to fetch and display real-time weather data, implementing dynamic UI updates and responsive design using Tailwind CSS.
