Percentage: 79.2% (2021)

ACADEMIC PROJECTS

- ❖ **PortFolio Website** [\[Link\]](#)
This is my personal portfolio built to showcase my work, skills, and background in a clean and modern way. It's fully responsive and easy to navigate, giving visitors a quick overview of who I am and the projects I've worked on.
- ❖ **JustPost - Secure File Transfer System**
A hackathon project that enables secure and efficient file sharing between users through a backend-powered system. It features a responsive UI and seamless file transfer experience.
- ❖ **Code-Editor App**
This is a desktop code editor I built using Electron.js. It supports opening, editing, and saving files, includes syntax highlighting, and even has an integrated terminal. The goal was to create a simple, lightweight editor that makes coding easier and smoother.
- ❖ **Chatbot**
This is an chatbot built using modern Web Development tools. It can understand user queries and respond in a conversational way, making interactions smooth and intuitive. The project focuses on creating a simple, responsive, and engaging chat interface.

Experience

Built and completed multiple projects independently, handling everything from design and development to testing and deployment.

Freelance Web Developer

- Worked with a client to fix website errors, resolve routing and path issues, and improve responsiveness across different devices.
- Enhanced the user experience by optimizing layouts and ensuring smooth website functionality.
